

Am I on target to achieve the goals I set at the beginning of the course?

No. Even if I get full points in the rest of my projects, I would only have 33.5 points total which doesn't qualify for an A. I would like to redo a few of my projects but I am currently behind. Also, meeting the timeline for the mid-project checkpoints is difficult for me to make because I start the projects later in the week. To make the timeline better, I want to begin earlier which means my other classes need to be done earlier since most of their due dates are before this class. However, I will start on this project before the other assignments due on Saturday since this one is less predictable on how long it will take.
